

SANJANA DHAWALE

ARTIFICIAL INTELLIGENCE & MACHINE LEARNING ENGINEER

☎ +91 8762354431

✉ sanjanadhawaleoff7@gmail.com

📍 Karnataka, India

PROFESSIONAL SUMMARY

Artificial Intelligence and Machine Learning engineering student with hands-on experience in AI-driven applications, data analytics, sentiment analysis, cybersecurity, IoT systems, and sustainability-focused engineering projects. Proven ability to design real-time intelligent solutions using modern frameworks and APIs. Strong analytical mindset with experience in internships, hackathons, and team leadership.

EDUCATION

Bachelor of Engineering (B.E.) – Artificial Intelligence & Machine Learning
Currently pursuing, 4th Year
KLS VEDIT, HALIYAL

Pre-University (PU) College – Science (Computer Science)
2021-2023
JSS RSH PU COLLEGE, DHARWAD

Secondary School (SSLC) – Science (Computer Science)
2011-2021
Bethel English Medium School, NAVANAGAR

TECHNICAL SKILLS

- AI & Data:
Machine Learning, Artificial Intelligence, Data Analytics, Sentiment & Predictive Analysis.
- Programming & Frameworks:
Python, Flask, FastAPI, Streamlit, Pandas, Scikit-learn
- Databases & Tools:
MongoDB, GitHub, APIs, Excel
- Other Domains:
Cybersecurity Fundamentals, IoT Systems, UI/UX Basics, Sustainable Energy Systems

SOFT SKILLS

Team Leadership, Problem Solving, Analytical Thinking, Communication, Collaboration, Time Management

CERTIFICATIONS

- Data Analytics, Cyber Security & Technology Job Simulations – Deloitte (Forage)
- Evaluation and Light Customization of Large Language Models – NVIDIA
- Artificial Intelligence Fundamentals – IBM SkillsBuild
- Complete MongoDB Series (12 Courses) – MongoDB Inc
- Algorithmic Solutions: Design & Problem Solving – Coursera
- Cyber Threat Hunting – Infosys Springboard
- Data Mining & Predictive Analytics – IEEE MSS & MIT Manipal

PROJECT EXPERIENCE

1] SentiIQ – AI-Powered Customer Sentiment Watchdog

Technologies: OpenAI, FastAPI, Hugging Face, Clerk, Lovable

- Built a real-time sentiment analysis system for support tickets, emails, and chats
- Implemented emotion detection, sentiment calendar visualization, and alerting system
- Integrated secure authentication and customizable business dashboard widgets

2] Fake News Detector

Technologies: Python, Flask, React / Lovable

- Developed an AI-based system to classify news articles as real or fake
- Supported instant predictions and batch processing with a user-friendly interface

3] Finance Dashboard

Technologies: Python, Streamlit, Pandas, Matplotlib, yfinance, Scikit-learn

- Built a dashboard to track personal, business, and investment finances
- Implemented automated calculations and stock price prediction models

4] Smart Bridge (IoT-Based Project)

Technologies: Arduino Uno, Python, IoT

- Designed an IoT-enabled bridge model to manage traffic and river flow
- Led system integration and automation logic

5] Waste Heat to Electricity Conversion

Technologies: Solar PV Cells, Peltier Module, Energy Storage

- Developed a sustainable model to convert waste heat into usable electrical energy
- Optimized temperature gradients and power regulation

INTERSHIP EXPERIENCE

Data Science Intern – Pinnacle Labs | 1 Month

- Strengthened data science skills through real-world analytical tasks
- Worked on data preprocessing, analysis, and insight generation

UI/UX Design Intern – CodeSoft | 1 Month

- Designed and developed a responsive login interface
- Improved usability, accessibility, and design consistency

Data Analyst Intern – Aczen Technologies | 1 Month

- Worked on lead management and database handling
- Assisted in real-time analytics and business data processing

ACHIEVEMENTS

- □ 3rd Place — ROBOTRIX Nationwide Robotics Hackathon (IEEE NITK)
 - Qualified Internship Common Aptitude Test (ICAT) — AIR #3499
 - Participant — Adobe India Hackathon
 - Participant — AI Agent Hackathon
 - Participant — GDG on Campus Solution Challenge (Google Developer Groups)
 - Final Round Selection — National Level SmartEcoSign Competition
-
